

Installation Guide

MySQL

Step 1: Check System Requirements

Windows:

- **Operating System:** Windows 10, Windows 8, Windows 7, Windows Server 2012, Windows Server 2016, or newer versions.
- **Processor:** 1 GHz or faster 32-bit (x86) or 64-bit (x64) processor.
- **Memory:** 2 GB RAM or more.
- **Disk Space:** Approximately 300 MB of available disk space.

MacBook:

- **Operating System:** macOS 13.0 or later.
- **Processor:** Intel-based Mac computer.
- **Memory:** 2 GB RAM or more.
- **Disk Space:** Approximately 300 MB of available disk space.

Linux:

- **Operating System:** Linux distributions that are supported by MySQL Workbench, such as Ubuntu, CentOS, Fedora, Debian, etc.
- **Processor:** 1 GHz or faster processor.
- **Memory:** 2 GB RAM or more.
- **Disk Space:** Approximately 300 MB of available disk space.

(mysql-workbench-community-8.0.34-macos-x86_64.dmg) MD5: 9de5b0fd6a6d5def72a708e6049f5385 Signature			

Step 3C: Linux users can skip the MySQL server download option and directly go to step 5.

Step 4A: To Install MySQL Server on Windows

- **Run the installer:** Locate the downloaded installer file and run it. The installation process will begin.
- **Follow the installation wizard:** The installer will guide you through the installation process.
- Select **“Complete”** when prompted to select the setup type in the installer. Follow the prompts and provide the necessary information such as the installation location, preferred options, and settings. You can usually accept the default settings unless you have specific requirements.

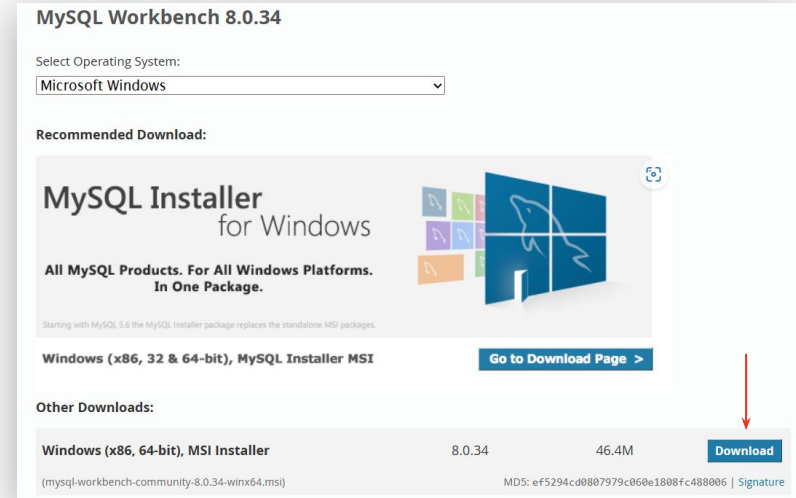

Step 4B: To Install MySQL Server on Macbook

- **Run the installer:** Locate the downloaded installer file and drag and drop it into the applications folder. The installation process will begin.
- **Follow the installation wizard:** The installer will guide you through the installation process.
- Select **“Complete”** when prompted to select the setup type in the installer. Follow the prompts and provide the necessary information such as the installation location, preferred options, and settings. You can usually accept the default settings unless you have specific requirements.

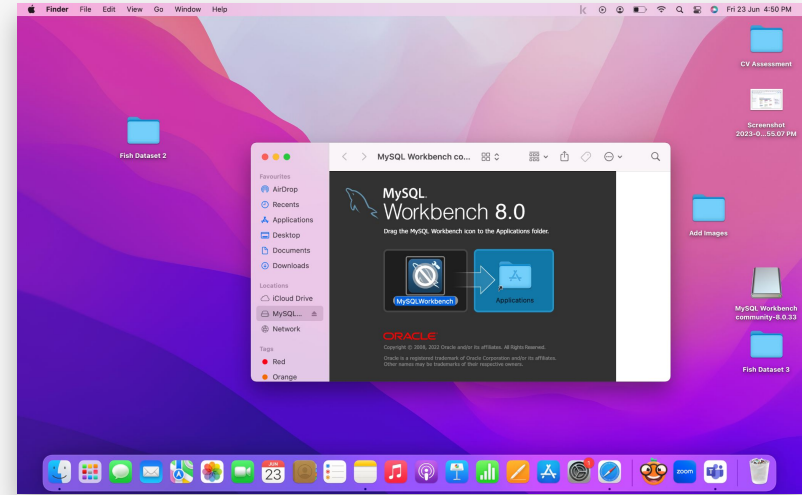

Step 5A: To Install MySQL Workbench on Windows

- **Download the installer from the link below:**
<https://dev.mysql.com/downloads/workbench/>
Select the option as shown on the right side.
- Locate the downloaded installer file and run it. The installation process will begin.
- **Follow the installation wizard:** The installer will guide you through the installation process.
- Select **“Complete”** when prompted to select the setup type in the installer. Follow the prompts and provide the necessary information such as the installation location, preferred options, and settings. You can usually accept the default settings unless you have specific requirements.

Step 5B: To Install MySQL Workbench on Macbook

- **Run the installer:** Locate the downloaded installer file and drag and drop it into the applications folder. The installation process will begin.
- **Follow the installation wizard:** The installer will guide you through the installation process.
- Select **“Complete”** when prompted to select the setup type in the installer. Follow the prompts and provide the necessary information such as the installation location, preferred options, and settings. You can usually accept the default settings unless you have specific requirements.

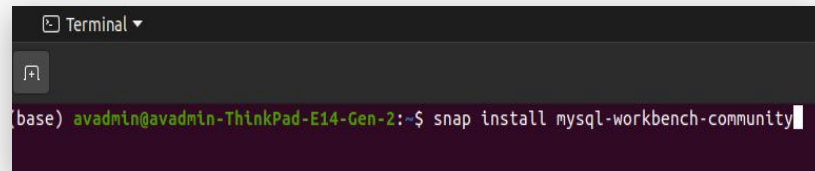

Step 5C: To Install MySQL Workbench on Linux

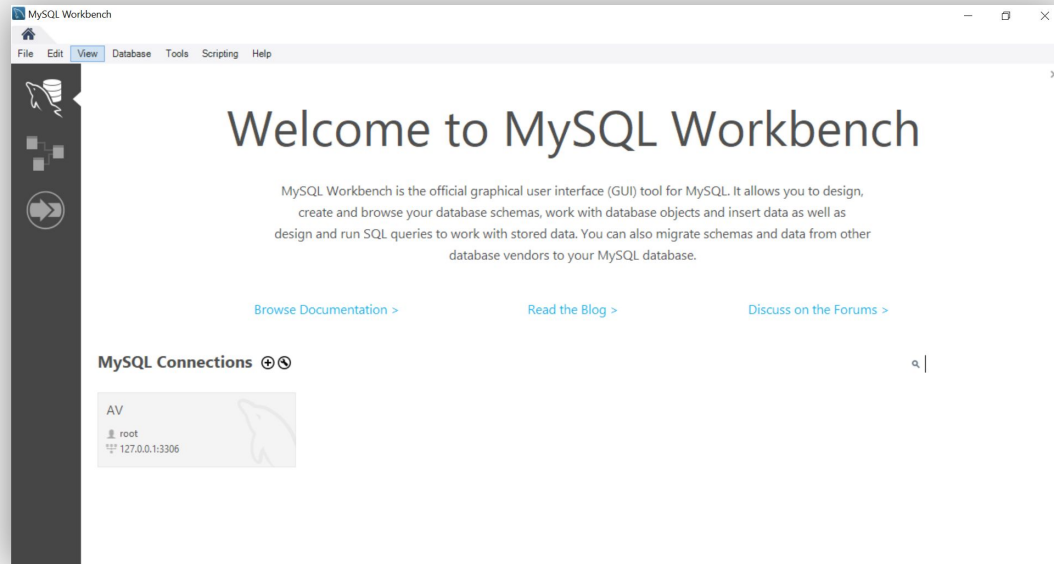

- **Open Terminal on Linux and type in the following code:** `snap install mysql-workbench-community`
- You maybe be prompted to type in the password for the line of code to execute.

NOTE: You do not need to download the installer from the website for installation of MySQL on Linux. This line of code works for Ubuntu version 20.04 and above only.

- Wait for terminal to complete the installation and you are ready to use MySQL Workbench.

A screenshot of a Linux terminal window. The title bar says "Terminal". The prompt is "(base) avadmin@avadmin-ThinkPad-E14-Gen-2:~\$". The command being entered is "snap install mysql-workbench-community".

```
(base) avadmin@avadmin-ThinkPad-E14-Gen-2:~$ snap install mysql-workbench-community
```

- **Step 5: Start Using MySQL Workbench**

Note: You will be prompted to create a connection before you can start using MySQL Workbench to run queries and retrieve data.

Please refer to the next lesson on the course to see how the same can be done.
